

ATM and Debit Card Solutions

Proven solutions from a trusted provider.

The ATM and Debit Card industry is changing. In the news you read about processors consolidating or failing to perform to expectations. Fraud and identity theft are costing financial institutions and consumers more money than ever. It's become increasingly important to choose a partner with the strength, experience and stability to help you deepen relationships with your financial institutions and drive additional revenue. Elan can help you overcome the challenges you are facing in choosing an ATM and debit provider.

Sell confidence and opportunity

Elan Financial Services is a name your clients will recognize and that you can be proud to associate with. We are the third largest ATM provider in the nation, processing transactions for over 31,000 ATMs and millions of ATM and debit cards. In addition, we manage ATM and debit programs for more than 1,600 financial institutions and credit card programs for more than 1,500 financial institutions across the country. Elan can help you deliver a broad array of competitive ATM and debit card solutions backed by cutting edge technology, exceptional service and enviable results.

Stability in uncertain times

You may read about it in the financial news or perhaps your organization has been impacted. Processors are being sold off or consolidated. And that means conversions for financial institutions and a lower level of satisfaction. By partnering with Elan to provide transaction services, you can rely on a stable environment from a processor that has been in business for more than 40 years. You can give your financial institutions peace of mind that they won't have convert due to consolidation.

Keeping up with compliance

As a result of the rapid increase in card fraud, more legal requirements for privacy and data security have resulted. Your financial institutions need help keeping current in the regulations and ensuring their equipment and processes are up to standards. Elan can provide services such as ATM outsourcing to ensure those needs are met.

Protection from the storm

Disaster recovery is a topic no one likes to discuss but it is of paramount importance to financial institutions. They need to know that in the unlikely event of a disaster, there will be no

downtime or lost information. They need to know they will continue to receive the support they need to keep their institution running. Elan has disaster recovery plans that are tested frequently, making sure your financial institutions never miss a beat. With redundant systems and back ups in place your financial institutions'

cardholders will always have access to their money. And with increasing regulatory audits of providers' disaster recovery efforts, you can feel confident that Elan is well equipped and can provide evidence of preparedness.

Through Elan you can:

Complete your offering with reliable ATM processing.

With nearly 40 years of EFT experience, Elan supports ATMs across the U.S. and provides gateways to all major ATM and POS networks. Our ATM processing enables your clients to easily manage their ATMs through our full set of tools, including 24/7 system monitoring, online report delivery, card management, and eQuest®, our data warehouse application. Increase revenue through transaction volume growth, various surcharging protocols and expanded delivery.

ATM and Debit Card Solutions

Provide a flexible menu of ATM services.

Capture more business and grow your profits by offering more of the services your clients demand. Pick and choose from our menu of options that can enhance your clients' existing ATM programs, from ATM replenishment which keeps money flowing at all times, to network monitoring, deposit collection and processing, disaster recovery and more.

Find a wealth of opportunity in our debit card solutions.

Help your clients translate increasing debit card usage into a significant market advantage.
